At New River Family Wellness, our doctors truly want to be town docs. That's why we're committed to providing free outreach services throughout the community. Want us to present a lecture on a health topic to your civic group, scout troop, or classroom? We can do that! Want us to come do a blood pressure screening at your church meeting, sit on a community board, or serve as a team doc? We can do that too, time permitting! Just fill out the form on the Outreach page of our website or give us a call to tell us about what you need; we're open to any health or social services-related ideas! And of course, this type of outreach is always free!
